PHILOSOPHICAL MAGAZINE B, 1990, VOL. 61, NO. 6, 1047–1053

SUBJECT INDEX

Vol. 61

A indicates papers published in Part A
B indicates papers published in part B
L indicates papers published in the Letters

	PAGE
A_2BX_6 cubic compounds, elastic anomalies in	67 B
AB alloys, correlation functions and domains in	189 B
Ag–CdS, defect reactions in	347 B
Ag_2Al, interface structure of	451 A
AgBr, structural disorder in	349 L
Al-based quasicrystals	107 L
Al–Cr–Fe–Ge alloys, icosahedral	177 B
AlCuCo quasicrystals	15 L
AlCuFe alloys, icosahedral and monoclinic phases of	173 L
AlCuFe, icosahedral, dislocations in	125 L
$Al_6Cu(Li, Mg)_3$, symmetry deviations in	167 A
AlFeCu, icosahedral, stability and faceting of	55 L
Alloys, crystal-to-glass transition in	639 B
Alloys, liquid, stability of HgNa and HgK	15 B
Alloys, simulated ordering of	189 B
Alloys, transition-metal, magnetic order in	773 B
Al–Mn icosahedral phase, simulation of	809 B
Al_2O_3, grain boundaries in	493 A
Al_6Pd, decagonal, structure of	819 A
AlPd, diffusion in	21 L
AlPdMn, icosahedral alloys of	9 L
AlSiMn quasicrystalline phase	119 L
Al–Ti, mechanical alloying of	473 B
Aluminides, IV-A, structural transformation in	941 B
Aluminium, anodic film growth on	925 B
Aluminium oxynitride spinel, space group of	417 A
Aluminium, strain-induced amorphization of	769 A
Aluminium-based metallic glasses	297 L
Amorphous AsSe films, photostructural changes in	851 B
Amorphous boron carbide, crystalline transformation in	49 L
Amorphous FeBTM, characterization of	691 B
Amorphous FeBSi alloys, magnetic properties of	579 B
Amorphous FeNiB, comminution of	567 B
Amorphous ferromagnetic ribbons, casting of	549 B
Amorphous ferromagnets, magnetic properties of	763 B
Amorphous ferromagnets, permeability relaxation in	727 B
Amorphous GeSnSe, optical properties of	955 B
Amorphous metals, formation of	453 B
Amorphous metals, structural instabilities in	751 B
Amorphous metals, structural relaxation in	739 B
Amorphous Metglas 2605 SC and CO, viscosity in	733 B
Amorphous semiconductors, Bi, defects in	1019 B
Amorphous Si, electronic structure of	161 L
Amorphous SiC, production of	107 B
Amorphous SiGeH alloys, density of states in	277 B
Amorphous Si:H, carrier densities in	153, 251 L

	PAGE
Amorphous Si:H, gap state density in	437 B
Amorphous Si:H, strain-relief spiral buckling of	281 L
Amorphous Si:H, trapping and recombination in	413 B
Amorphous SiC, electronic structure of	237 B
Amorphous ternary alloys, thermal equilibrium in	865 B
Anthracene, deformation in	607 A
Antiphase boundary energies in Ni_3Fe	909,917 A
β-Mn-type, transformation of quasicrystal to	63 L
Bi amorphous semiconductors, defects in	1019 B
Bismuth cluster, supported	45 A
Boron carbide, crystalline to amorphous transition in	49 L
Calcia-stabilized zirconia, defect structure of	1 A
Carrier transport from modulated photogeneration	237 L
Catalysis, heterogeneous, and dielectric response	231 L
Chalcogenides, Ag-doped, complex impedance of	201 B
Chalcogenides, vitreous, photodoping in	857 B
Clusters, bismuth, supported	45 A
Clusters, quantum-dot, in glasses	327 L
CoTi, plastic flow in	785 A
Crack growth in solids	1 L
Cracks from fatigue, modelling of	435 A
Crystal growth of radiating filaments of SiC	943 A
Crystal-to-glass transition in alloys	639 B
Crystalline and decagonal phases, relationship between	319 L
$CuAlO_2$, twinning in	285 L
Cu_3Au, order–disorder transition in	195 L
Cu–Fe alloy, stacking fault tetrahedra in	929 A
Cu–Zn–Al shape-memory alloys, quenching effects in	221 A
Cu–Zn–Al shape-memory alloys, thermoelasticity of	159 A
Dangling bonds in a-Si:H	393,425 B
Decagonal Al_6Pd, structure of	819 A
Decagonal and crystalline phases, relationship between	319 L
Decagonal phase of FeNb and structure model	69 L
Defect creation in a-Si:H transistors	251 B
Defect reactions in Ag–CdS	347 B
Defect structure of Si surfaces	257 A
Defects in a-Si:H, Staebler–Wronski effect	879 B
Defects in Nb_3Te_4	193 A
Deformation, grain geometry changes during	61 A
Deformation in anthracene	607 A
Deformation mechanisms in TiAl	141 A
Deformation of GaAs as function of doping	619,647 A
Deformation of TiAl	591 A
Deuterium in silicon, flux model of	147 L
Diamond, dislocations in	873 A
Diamond, stacking faults in	987 B
Diamond, synthetic, optical centres in	795 B
Diamonds, type IaB, voidites in	343 L
Dielectric response and heterogeneous catalysis	231 L
Diffusion equation for crack growth in solids	1 L
Diffusion of grain boundaries, coefficients of	801 A
Diffusivity and mobility of lattice gases	855 A
Dipolar behaviour of Ag-doped chalcogenides	201 B
Dislocation, quasicrystal, Burgers vector of	169 L

	PAGE
Dislocation and plasticity in III–V semiconductors	673 A
Dislocation group, soliton-like behaviour of	827 B
Dislocation substructure, origin of	281 A
Dislocations and grain boundaries, image effects between	291 A
Dislocations in icosahedral AlCuFe	125 L
Dislocations in zinc oxide	83 L
Dislocations on surface of Tb_4O_7	269 L
Disorder in AgBr	349 L
Ductility in Ni_3Al	5 L
Edge dislocations in NiO	99 A
Elastic anomalies in cubic A_2BX_6 compounds	67 B
Electrodeposited NiP alloys	43 L
Electron scattering cross-sections, inelastic	311 B
Entropy of mixing of liquid semiconductors	1003 B
Epitaxy, solid-phase, of implanted silicon	101 L
Fatigue-crack modelling, influence of grain orientation	435 A
FeBSi amorphous alloys, magnetic properties of	579 B
FeBTM amorphous ribbons, characterization of	691 B
FeCu and FeCuNi, structure of precipitates in	223 L
FeNb decagonal phase and structure model	69 L
FeNiB amorphous ribbons, comminution of	567 B
Fe–NiCr alloys, swelling in	733, 751 A
Ferromagnetic amorphous ribbons	549 B
Ferromagnets, amorphous, magnetic properties of	763 B
Finnis–Sinclair potentials	139 L
Fracture, mode-III, model of	85 A
Fresnel fringes in Si/SiO_2 interfaces	35 A
GaAs, deformation of as function of doping	619, 647 A
GaAs, photoplastic effect in	893 A
GaAs bipolar–unipolar transistor	333 L
Germanium, dislocations in	873 A
Germanium, grain boundaries in	329 A
GeSnSe, amorphous, optical properties of	955 B
Glass transition in metallic glasses	539 B
Glass–liquid transition in metal alloys	299 B
Glasses, metallic, glass transition in	539 B
Glasses, metallic, rapid heating of	701 B
Glasses, metallic, structural relaxation in	715 B
Glasses, molybdenum tellurite, electrical transport in	87 B
Glasses, quantum-dot semiconductor clusters in	327 L
Glassy chalcogenides, photodoping in	857 B
Grain boundaries, twist, in f.c.c. metals	305 A
Grain boundaries, structural units of	91 L
Grain boundaries and dislocations, image effects between	291 A
Grain boundaries in Al_2O_3	493 A
Grain boundaries in high-T_c superconductors	129 B
Grain-boundary diffusion coefficients, calculation of	801 A
Grain geometry changes during deformation	61 A
HgNa and HgK liquid alloys, stability of	15 B
High-resolution EM images, simulation of	29 L
Hole formation, nanometre, in MgO	181 L

PAGE

Icosahedral Al–Cr–Fe–Ge alloys . . . . . 177 B
Icosahedral AlFeCu, stability and faceting of . . . . . 55 L
Icosahedral alloys of AlPdMn . . . . . 9 L
Icosahedral and monoclinic phases in AlCuFe alloys . . . . . 173 L
Icosahedral deviations in $Al_6Cu(Li, Mg)_3$ . . . . . 167 A
Icosahedral phase of Al–Mn, simulation of . . . . . 809 B
Icosahedral quasicrystals and magnetism . . . . . 677 B
Imaging, combined direct and indirect . . . . . 245 A
Impurities in $KNbO_3$ . . . . . 543 A
Inelastic electron scattering cross-sections . . . . . 311 B
InP, metal–insulator transition in . . . . . 293 L
Interdiffusion in oxides . . . . . 685,707,725 A
Interface structure of Ag_2Al . . . . . 451 A
Ion-beam-deposited epitaxial silicon films . . . . . 311 L

$KNbO_3$ impurities in . . . . . 543 A

Lattice damage in titanium . . . . . 839 A
Lattice-gas pressure, evaluation of . . . . . 337 B
Lattice gases, diffusivity and mobility of . . . . . 855 A
Lattice imaging, direct and indirect combined . . . . . 245 A
Laue zone diffraction from stacking faults . . . . . 385 A
Light metals, rapid solidification of . . . . . 487 B
Liquid metals, quantum interference in . . . . . 147 B
Liquid semiconductors, mixing entropy of . . . . . 1003 B
Lithium niobate, hopping conduction in . . . . . 1031 B
Localized states in amorphous semiconductors . . . . . 77 L

Metal alloys, glass–liquid transition in . . . . . 299 B
Metal–insulator transition in InP . . . . . 293 L
Metal–silicon alloys, properties of . . . . . 601 B
Metallic alloys, order–disorder transformation in . . . . . 785 B
Metallic glass properties, calculation of . . . . . 963 B
Metallic glasses, aluminium-based . . . . . 297 L
Metallic glasses, hidden symmetry in . . . . . 649 B
Metallic glasses, rapid heating of . . . . . 701 B
Metallic glasses, structural relaxation in . . . . . 715 B
Metallic phases, metastable . . . . . 447,449 B
Metals, amorphous, formation of . . . . . 453 B
Metals, amorphous, structural instabilities in . . . . . 751 B
Metals, b.c.c., self-diffusion in . . . . . 563 A
Metals, liquid, nucleation in . . . . . 1 B
Metastable metallic phases . . . . . 447,449 B
Metastable-phase formation, thermodynamics of . . . . . 511 B
Metastable phase transformations . . . . . 525 B
Metglas 2605 SC and CO, viscosity in . . . . . 733 B
MgO, nanometre hole formation in . . . . . 181 L
Microwave conductivity in deformed silicon . . . . . 97 B
Molybdenum tellurite glasses, electrical transport in . . . . . 87 B
Monte Carlo simulations of lattice-gas pressure . . . . . 337 B
MoS_2, three-dimensional diffraction from . . . . . 363 A

N-beam phase contrast effect, theory of . . . . . 205 A
Nanosecond laser-induced phase transitions . . . . . 587 B
Nb_3Te_4, lattice defects in . . . . . 193 A
Negative differential resistance device . . . . . 339 L
Ni ion in cubic crystals, spin–lattice coupling for . . . . . 245 L

	PAGE
Ni_3Al, ductility in	5 L
Ni_3Al, screw superdislocations in	259 L
Ni_3Al alloys, domain boundaries in	469 L
Ni_3Fe, antiphase boundary energies in	909, 917 A
NiO, edge dislocations in	99 A
NiP alloys, electrodeposited	43 L
Non-periodic objects, image simulation of	29 L
Nucleation in liquid metals	1 B
Octagonal phase, three-dimensional model for	305 L
Optical centres in synthetic diamond	795 B
Order–disorder transformation in metallic alloys	785 B
Order–disorder transition in Cu_3Au	195 L
Oxide films, annealed anodic, on aluminium	133 L
Oxide superconductors, electrical properties of	217 L
Oxides, point defect relaxation and interdiffusion in	685, 707 A
P-enhanced diffusion in silicon	553 A
PbSe–SnSe superlattices, structural transformation in	893 B
Permeability relaxation in amorphous ferromagnets	727 B
Phase boundaries and dislocations in Ni_3Al	469 A
Phase contrast effect, *N*-beam, theory of	205 A
Phase quenching in metastable metallic phases	587 B
Phosphorus-doped silicon, electronic transport in	377 B
Photoconductivity of silicon-on-insulator FETs	37 L
Photodoping in vitreous chalcogenides	857 B
Photogeneration, modulated, effect on carrier transport	237 L
Photoplastic effect in GaAs	893 A
Photostructural changes in a-AsSe films	851 B
Phthalocyanines, substituted, Langmuir–Blodgett films	841 B
Pinning, Zener, simulation of	579 A
Plastic flow in CoTi	785 A
Plastic deformation of Ti_3Al	109 A
Plasticity of GaAs	233 A
Point defect relaxation in oxides	685, 707 A
Polaronic hopping in lithium niobate	1031 B
Poly(n-propylmethylsilane), charge-carrier transport in	59 B
Polymer, polysilane, charge-carrier transport in	59 B
Polymers, silicon, electronic transport in	25 B
Polytypism in silicon carbide	217 B
Potentials, Finnis–Sinclair	139 L
Precipitates, structure of in FeCu and FeCuNi	223 L
Quantum-dot semiconductor clusters in glasses	327 L
Quantum interference in liquid metals	147 B
Quasicrystal dislocation, Burgers vector of	169 L
Quasicrystal model based on supercubic structures	155 B
Quasicrystal to β-Mn-type transformation	63 L
Quasicrystalline growth in AlPd	21 L
Quasicrystalline phase of AlSiMn	119 L
Quasicrystals, Al-based	107 L
Quasicrystals, comparison with stainless steel	115 L
Quasicrystals, hidden symmetry in	649 B
Quasicrystals and magnetism	677 B
Quasicrystals of AlCuCo	15 L

PAGE

Rapid solidification of light metals . . . . . 487 B
Resistance device, negative differential . . . . . 339 L

Screw superdislocations in Ni_3Al . . . . . 259 L
Self-diffusion in b.c.c. metals . . . . . 563 A
Semi-insulating silicon, structure of . . . . . 361 B
Semiconductors, dislocation mobilities and plasticity in . . . . . 673 A
Shape-memory alloys, Cu–Zn–Al, quenching effects in . . . . . 221 A
Si, amorphous, electronic structure of . . . . . 161 L
Si surfaces, defect structure of . . . . . 257 A
SiC, crystal growth of radiating filaments of . . . . . 943 A
SiC, crystalline to amorphous transition in . . . . . 107 B
SiGeH alloys, amorphous, density of states in . . . . . 277 B
Si:H, amorphous, carrier densities in . . . . . 153, 251 L
Si:H, amorphous, dangling bonds in . . . . . 393, 425 B
Si:H, amorphous, gap-state density in . . . . . 437 B
Si:H, amorphous, strain-relief spiral buckling in . . . . . 281 L
Si:H, amorphous, Staebler–Wronski effect in . . . . . 403 B
Si:H, amorphous, trapping and recombination in . . . . . 413 B
Si:H transistors, amorphous . . . . . 251, 263 B
Si/SiO_2 interfaces, Fresnel fringes in . . . . . 35 A
Silicon, competing growth phases in . . . . . 311 L
Silicon, deformed, microwave conductivity in . . . . . 97 B
Silicon, dislocations in . . . . . 873 A
Silicon, flux model of deuterium in . . . . . 147 L
Silicon, grain boundaries in . . . . . 329 A
Silicon, P-doped, electronic transport in . . . . . 377 B
Silicon, P-enhanced diffusion in . . . . . 553 A
Silicon, semi-insulating, structure of . . . . . 361 B
Silicon, solid-phase epitaxy of . . . . . 101 L
Silicon carbide, amorphous, electronic structure of . . . . . 237 B
Silicon carbide, polytypism in . . . . . 217 B
Silicon–metal alloys, properties of . . . . . 601 B
Silicon-on-insulator FETs, photoconductivity of . . . . . 37 L
Silicon polymers, electronic transport in . . . . . 25 B
Soliton-like behaviour of a dislocation group . . . . . 827 B
Spherical strain centres, simulation of . . . . . 23 A
Spin–lattice coupling for Ni ion in cubic crystals . . . . . 245 L
Spinel, aluminium oxynitride, space group of . . . . . 417 A
Stacking fault tetrahedra in Cu–Fe . . . . . 929 A
Stacking faults, Laue zone diffraction from . . . . . 385 A
Stacking faults in natural diamond . . . . . 987 B
Staebler–Wronski effect in a-Si:H . . . . . 403 B
Steel, stainless, comparison with quasicrystals . . . . . 115 L
Strain centres, simulation of . . . . . 23 A
Strain-induced amorphization of aluminium . . . . . 769 A
Structural relaxation in amorphous metals . . . . . 715, 739 B
Structural transformations in IV-A trialuminides . . . . . 941 B
Structural units of grain boundaries . . . . . 91 L
Superconductors, high-T_c, grain boundaries in . . . . . 129 B
Superconductors, oxide, electrical properties of . . . . . 217 L
Superconductors, YBaCuO, HREM images of . . . . . 513 A
Superconductors, YBaCuO, stress-corrosion cracking in . . . . . 209 L
Supercubic structural model of quasicrystals . . . . . 155 B
Superlattices of PbSe–SnSe, transformations in . . . . . 893 B
Swelling in Fe–Ni–Cr alloys . . . . . 733, 751 A

PAGE

Tantalum, anodic film growth on . . . . . 925 B
Tb_4O_7, dislocations on surface of . . . . . 269 L
Ternary alloys, amorphous, thermal equilibrium in . . . . . 865 B
Thermoelasticity in Cu–Zn–Al shape-memory alloys . . . . . 159 A
Ti_3Al, plastic deformation of . . . . . 109 A
Ti_3Al, yield stress of slip in . . . . . 203 L
TiAl, antiphase domains and twinning in . . . . . 95 L
TiAl, deformation of . . . . . 141, 591 A
TiN films, structural analysis of . . . . . 627 B
Tin, ion-implanted, xenon bubbles in . . . . . 531 A
Titanium, lattice damage in . . . . . 839 A
Transistor, bipolar–unipolar GaAs . . . . . 333 L
Transition-metal alloys, magnetic order in . . . . . 773 B
Twinning in $CuAlO_2$. . . . . 285 L
Twinning in ZnSe films . . . . . 273 L
Twins and antiphase domains in TiAl . . . . . 95 L
Twist grain boundaries in f.c.c. metals . . . . . 305 A

Voidites in type IaB diamonds . . . . . 343 L

YBaCuO superconductors, HREM images of . . . . . 513 A
YBaCuO superconductors, stress-corrosion cracking in . . . . . 209 L
Yield stress of slip in Ti_3Al . . . . . 203 L

Zener pinning, simulation of . . . . . 579 A
Zenon bubbles in ion implanted tin . . . . . 531 A
Zinc oxide, dislocations in. . . . . 83 L
Zirconia, calcia-stabilized, defect structure of . . . . . 61 A
ZnSe films, stability of twins in . . . . . 273 L

PHILOSOPHICAL MAGAZINE B, 1990, VOL. 61, NO. 6, 1055–1067

INDEX OF AUTHORS (WITH TITLES)
